ABB Pre-Owned Parts
Frequently asked questions and parts list

Q: Where do they come from?
A: ABB continuously harvests its secure sourcing channels worldwide for surplus automation parts. Because they come from upgrades and inventory buybacks from end users, often where ABB has been doing the service, ABB Pre-Owned Parts are a higher quality base part than those from third party parts warehouses.

Q: How is a POP different from a refurbished part?
A: Refurbished parts are exchanged parts, and completely refurbished and repaired. All engineering changes and design updates are applied, along with replaced components, updated RAM, etc.

Product Line	Part Number	Material Description	Sell Price
800xA Industrial IT	P3BSE045584R1	AO845 ANALOG REFURB PRE-OWNED	$839.30
